

TOWN OF CONCORD TOWN BOARD
Work Session 6:30 p.m.

October 14, 2021

Highway Superintendent Edwards reviewed his Monthly Report with the Board:

- Pages 1-2 are his Highway monthly report.
- Pages 3-4 is the letter that Councilman Zittel requested with regard to Viking standing behind the price of the equipment.
- Page 5 is the Valley Fab and Equipment quote for the snow box for the high lift in the amount of \$8,900.
- Page 6 is the Viking Cives quote for the snow box for the high lift in the amount of \$10,479.
- Page 7 is a copy of the September 9th Minutes listing the items declared surplus and put on Auctions International. Hwy Supt Edwards would like to add the little roller to this list. If the Town is not happy with the price of any of the items going to Auctions International, the Town does not have to accept the bid. Hwy Supt Edwards would like to add the little roller to see what it would bring; he will run the bid prices to the Board before accepting the bids. If an item is not sold, there is a \$30 charge. If an item is sold, the buyer pays the sales commission to Auctions International.
- Page 8 is for the Western Star truck. The way it was done was running the Western Star truck and the box/wing all under the same contract so one check will be made to Fleet Maintenance and they will pay off Viking. The total price was \$2,000 cheaper than the original price because some of the items were taken off.
- Page 9 is the warranty information: 7 years 150,000 miles. The truck will be built in June or July of 2022 and they should have it by September or October 2022.

Hwy Supt Edwards advised the Board that he accompanied a contractor to Community Park today to look at the shelter roof. A quote will be sent in to Supervisor Drake.
